

## New Jersey Institute of Technology

Campus Center, Academic Building  
Newark, New Jersey

1

The new NJIT Campus Center and Academic Building work as a composite assemblage uniting the Campus Green with the eastern edge of campus. A third floor pedestrian bridge connects the two buildings physically and creates a visual terminus for a pedestrian street. It also links the Academic Building with both a new roof terrace and a new exterior stair leading to the Campus Green.

Spatially, the gentle curve of the new Campus Center Facade projects into the Green and creates a new and dynamic presence, encouraging students to either enter the building or flow around it.

The new Campus Center contains a cafeteria, ballroom, meeting rooms, student lounge, game rooms, student offices, faculty dining and a pub.

The new Academic Building houses administrative offices, classrooms and computer labs in a highly flexible loft space. The Academic Building extends the campus image to MLK Boulevard and forms a backdrop for Eberhardt Hall.
